ARIZONA DEPARTMENT OF EDUCATION

JANUARY 15, 1999

The focus of the Arizona Department of Education's work in 1998 can be summarized in two words: achievement and accountability. As schools across the state incorporated Arizona's nationally recognized Academic Standards into their classrooms, we saw a significant increase in our students' Stanford 9 test results. Our high schools strengthened course offerings to prepare students for Arizona's Instrument to Measure Standards (AIMS). And all of our schools have sharpened their efforts on providing every student with the fundamental skills -- reading, writing and mathematics -- essential to their future success.

The high school version of AIMS will be administered to all sophomores in the spring of 1999, and will become a graduation requirement for the class of 2002. Assessments in grades 3, 5 and 8 will follow in 2000. Educators, parents and students now have clear guidelines for what students should know and be able to do, and a way to measure student progress in achieving those benchmarks.

Teachers, too, will be required to demonstrate proficiency in the classroom before earning a permanent teaching certificate, in addition to passing a more rigorous paper-and-pencil test. If we are demanding excellence from our students, we can expect no less from our teaching corps.

In order to improve our financial accountability to taxpayers, the Department is developing a Student Accountability Information System, which will improve recordkeeping, reduce reporting errors, and give the public unprecedented access to budgetary information at the school level. Support for public education is contingent on public confidence that we are spending tax dollars wisely and well.

Charter schools continue to occupy an ever-expanding niche of the educational market, helping to absorb Arizona's growing student population. As parents become more informed consumers of the educational choices available, demands for accountability in this arena have also increased. We remain committed to providing parents with the information they need to make the best choice of public school – traditional or charter – for their child.

Finally, 1998 saw the end of eight years of litigation over school capital finance. With the passage of Students FIRST, the state now guarantees funding for school construction in every corner of the state, in a way that is fair and equitable to taxpayers and students.

In 1995 we articulated a belief that all students should have access to extraordinary education. Although much work remains to be done, in the past four years I believe we have made significant progress in achieving this vision. I would be remiss if I did not thank the Department staff and Arizona educators who share this vision, and who work daily to make it a reality. My deepest gratitude to you all.

Sincerely,

A handwritten signature in black ink, appearing to read "Lisa Graham Keegan", written over the printed name.

STATE FUNDING FOR EDUCATION

The general fund appropriation for the State of Arizona in 1997-98 was \$5,139,847,800. The total for all education including the Board of Regents and Community colleges was \$2,951,838,900 or 57.4 percent of the total appropriation. The Department of Education was appropriated \$2,121,661,200 or 41.3 percent of the total. The graph below shows the percentage appropriated for other governmental functions. The majority of the general fund appropriation to the Department of Education is paid in basic and additional state aid to local school districts and charter schools.

SUMMARY OF APPROPRIATED FUNDS BY AGENCY FY 98 - GENERAL FUND ONLY

Total revenues available to school districts in 1988-89 through 1997-98 and the percentage by source are indicated on Table 1. For fiscal years 1989 and 1990, the Total Revenues included Maintenance and Operation, Capital Outlay, Adjacent Ways and Debt Service Funds only. For fiscal year 1991 through 1998, the Total Revenues include School Plant, State and Federal Projects in addition to the four funds included in previous years.

¹ Percentages of revenue by source are calculated based on information reported by district sponsored charter schools on their Annual Financial Report. For FY 1997-98 districts were paid over \$18 million in state equalization assistance for their sponsored charter schools. The discrepancy may be due to charter schools reporting state equalization assistance as local payments from the sponsoring district.

EXPENDITURE HISTORY

The total expenditures for maintenance and operation (M & O) for 1997-98 were \$3,186,707,446. This represents an increase of 5.8% over 1996-97 M & O expenditures. This increase is primarily due to increases in total student growth (see Table 3).

ADM HISTORY AND DISTRIBUTION

The average daily membership (ADM) in elementary and secondary districts increased by about 197,000 students over the ten-year period of 1988-89 to 1997-98. As shown in Table 3, student growth was less than 3.0% for fiscal years 1988-89 through 1990-91. Since 1991 student growth has increased at a higher rate, dropping somewhat in the past year. Each year's figures are the basis for equalization assistance payments in the following fiscal year.

DISTRIBUTION OF SCHOOL DISTRICTS BY ADM AND SIZE

The distribution of district population is shown in the graph above. The 22 largest districts in the state have over 60 percent of the students while 75 districts only have about 1 percent of the student population. For a further breakdown of districts by type and county, see page 12.

The fall enrollment for 1997-98 was 794,701. A breakdown of school district enrollment by racial and ethnic background is included on page 13.

DISTRIBUTION OF CHARTER SCHOOLS BY ADM AND SIZE

The distribution of the charter schools population is shown in the graph above. Eighty-two percent of the charter schools in the state have less than 300 students and 53 percent of the charter school student population. Thirteen percent of the charter schools in the state have between 300 and 600 students and 28 percent of the charter school student population. The remaining 5 percent of the charter schools have between 600 and 1,000 students and 19 percent of the charter school student population. For a further breakdown of charter schools by type and county, see page 12.

The fall enrollment for 1997-98 was 19,762. A breakdown of charter school enrollment by racial and ethnic background is included on page 14.

Definitions for Current and Total Expenditures

The following pages present data on total and per pupil expenditures for school districts and for charter schools. Two different types of expenditures are listed: current expenditures and total expenditures by fund or project.

1. **Current expenditures:** Expenditures for elementary and secondary education, excluding expenditures for land and improvements, buildings and improvements, furniture, equipment, and vehicles, Internal Service Fund operations, Community School Fund operations, debt retirement, student activities, and nonpublic school programs (e.g., adult/continuing education, community college education, community services, and day care centers). Current expenditures are reported under the following subcategories:
 - a. Classroom Instruction
 - b. Classroom Supplies
 - c. Administration
 - d. Support Services-Students
 - e. Other Support Services & Operations
2. **Total expenditures by fund---School districts:**
 - a. Maintenance and operations: Total maintenance and operation expenditures (as defined on page II-1) minus tuition-out expenditures. Tuition-out expenditures are excluded in order to provide a more accurate per pupil expenditures.
 - b. Capital: Sum of expenditures from the capital outlay and debt service funds. Refer to page II-1 for further definitions.
 - c. Other: Sum of expenditures from adjacent ways, school plant, federal projects, state projects, food services, auxiliary operations, unemployment insurance and other.
3. **Total expenditures by project---Charter schools :** Charter schools are not subject to categorical distinctions between maintenance and operations or capital. Expenditures for charter schools are divided into general project expenditures and state/federal project expenditures, according to the charter school's Annual Financial Report.

Total and current expenditures for each school district and charter school were reported to the Arizona Department of Education on the district or charter school's Annual Financial Report (AFR). Information on the AFR is not audited. The per pupil amounts were calculated by dividing the reported expenditure figures by the attending ADM (average daily membership) for the district or charter school. The ADM used in making the per pupil calculations was obtained from the membership days reported to the Arizona Department of Education from each district or charter school. The current expenditure figures and the expenditures by fund or project are reported separately on the Annual Financial Reports. Differences between current expenditures and total expenditures are due to definitional differences, differences in reporting and/or differences in how districts and charter schools account for expenditures.
